- 2 100 employees and contract workers
- Yearly revenue for park’s companies is 2 000 billion ROL
Floreasca Science and High Technology Park

Opportunities

- Excellent gate connecting to the EU and other high tech areas
- The park is appropriate for:
  - High Technology Transfer
  - Implementation of high tech programs in Romania and Eastern Europe
  - Development and coordination of complex programs requiring system engineering, automation, software, and IT&C expertise
  - Research and development
Floreasca Science and High Technology Park

Our Strength

- Infrastructure, land, and buildings valued at tens of millions of Euro
- An existing science and high tech park core already in place
- Many successful firms already operating in this park
- The best personnel you can find in Romania for employment in high tech areas
Floreasca Science and High Technology Park

Park Development

- Creating synergy among park’s firms to develop national programs, so that the park becomes the high tech transfer gate of Romania
- Bringing more firms and more employment to the park
- Continuation of our effort to organize and improve the park; finalizing the formal registration
- In five years we want to reach:
  - a built area of 120,000 sqm,
  - employment of 10,000,
  - park revenue of 400 million Euro per year.
Floreasca Science and High Technology Park
